Dark Shade 5 Lens: With a Dark Shade 5 lens, these safety glasses are ideal for applications that require protection against intense light, such as welding, metalworking, or other high-heat tasks.	✓	
Impact Resistance: Constructed from ultra-durable polycarbonate, these glasses meet the ANSI/ISEA Z87.1-2010 safety standards, making them resilient against impacts, including debris and flying particles.	✓	
Comfortable Fit: The lightweight and ergonomic design of these safety glasses guarantees all-day comfort. The contoured nose bridge and adjustable temples ensure a secure, customizable fit for various face shapes.	✓	
Scratch-Resistant Coating: The lenses are treated with a scratch-resistant coating to extend their lifespan and maintain excellent visibility.	✓	
UV Protection: The Ocelot Model CS321B Dark Shade 5 Safety Glasses offer 99% protection from harmful UVA and UVB rays, making them suitable for both indoor and outdoor applications.	✓	
Versatile Use: These safety glasses are ideal for a wide range of applications, including construction, woodworking, laboratory work, automotive maintenance, and sports shooting.	✓	
Stylish Design: Ocelot takes pride in combining safety with style. The Model CS321B's sleek, contemporary design means you can stay safe without compromising your professional image.	✓	
Anti-Fog Technology: The anti-fog feature helps maintain a clear field of vision, even in situations where temperature variations can cause lens fogging.	✓	

Invest in your safety and vision with the Ocelot Model CS321B Dark Shade 5 Safety Glasses, and experience the perfect blend of protection and style. With Ocelot, you can see clearly, work confidently, and stay safe, no matter the task at hand.
