COMPANY PROFILE

Safety Plus Limited was established on October 2002 and inaugurated as a Limited Liability Company. From the date of inception to this present time, we have been effectively meeting the demands of the Energy, Commercial and Other Industrial Related Sectors.

Safety Plus Limited is dedicated to bringing value to the industry with quality products and a high level of customer service. We are consistently working to bring our customers the newest and most innovative products in the fire- and life-safety industries. We never settle for anything but the best and neither will you with the best equipment, the best services, the best delivery and the best prices.

Safety Plus Limited carries over 4,200 top-quality products that are available 24/7. Customer satisfaction is our focus and strength, we stick to deadlines and delivery dates above all others.

FIRE ALARM AND SUPPRESSION SYSTEMS

Fire Alarm Systems

To meet the requirements of our ever-changing market, we pride ourselves on being a complete fire alarm system supplier. This means our customers can rely on us for their entire fire system requirements.

One of the main advantages of using a complete system supplier, rather than a component supplier, is that system wide compatibility is assured.

Safety Plus Limited offers complete system supply and installation its one of the reasons we made a choice to represent Edwards system Technology. Safety Plus Limited is the authorised distributor for the design, installation and maintenance of these systems. When the system is sourced from one manufacturer, there is one point of contact and no compatibility issues.

“Need a quote? Contact us today and we would be glad to do a site visit and work out an estimate.”

Whether EST life safety systems are protecting the lives and livelihoods of the people who make businesses run, or the lives entrusted to the care

of public institutions; whether they're charged with protecting the guests of the world's finest hotels, or preserving irreplaceable artefacts that bring history to life; EST stands alone as the brand closely associated with some of the most important and far-reaching developments in the life safety industry today.

Instead of reporting alarms by general location or zones, EST Intelligent Fire Alarm Systems can zero in on each device and identify its specific location and status, saving time and confusion in an emergency. As your business needs change, the modular design of our systems lets you network additional Fire Alarm Control panels or add new devices as your facility grows. This flexibility means substantial cost savings in your investment. EST offers intelligent addressable systems ranging from small single alarm panel systems to complete, networkable solutions for large-scale applications. Our EST3 panel can incorporate security systems such as access control, intrusion and CCTV, for a one system solution to all your safety and security needs.

Edwards systems technology offers a wide range of product offerings all of which Safety Plus Limited is ready to supply and install.

Fire Suppression

Fire suppression systems are used in conjunction with detection and alarm systems to improve and increase personal and asset safety. Suppression systems are governed by the relevant NFPA codes, which Safety Plus Limited personnel are trained in for design, installation, service and maintenance of these systems.

What do you need to keep in mind when considering a Suppression System?

The answer is Reliability!!

Safety Plus Limited can offer you Reliable Systems from top quality manufacturers coupled with our expertise and experience make us your choice. The manufacturers we represent afford us the pleasure of offering you safe, reliable and affordable solutions to protect your most valued assets.

Quality and reliability go hand in hand. Safety Plus Limited is dedicated to bringing value to the industry with quality products and a high level of customer service. We are consistently working to bring our customers the newest and most innovative products in the fire- and life-safety

industries. We never settle for anything but the best and neither will you!

Keeping this in mind we are pleased to present to you with quality products from leading manufacturers in the industry.

SEVO Systems products revolutionize the way clean agent fire suppression systems are designed, installed and maintained. We take advantage of the unique chemical characteristics of a fluid to store it as a liquid, but deliver it as a gas.

SEVO Systems' exclusive mission is to develop and commercialize equipment and systems optimized for the unique properties of 3M™ Novec™ 1230 Fire Protection Fluid for the use in fire protection, differentiating SEVO from all other OEM's.

SEVO Systems is a manufacturer of waterless fire protection utilizing 3M™ Novec™ 1230 Fire Protection Fluid in many industries including oil and gas, marine, power generation, telecommunications and electrical data and control.

FIRE SUPPRESSION SERVICE DEPARTMENT

Fire protection equipment requires periodic maintenance. Safety Plus Limited can provide a complete inspection and service as required by the relevant NFPA codes. We will make recommendations to ensure your facility is protected with the appropriate fire extinguishers, hose reels, clean agent suppression systems, fire monitors, fire sprinklers, etc. Our trained technicians and sales persons can provide you with a quotation and we can supply, install, commission and maintain.

Safety Plus Limited is the authorised distributor for Amerex Fire extinguishers, Amerex Restaurant Suppression Systems, Sevo Suppression Systems and Magnum Foam Systems. We distribute and wholesale Brooks equipment for genuine service parts for a variety of extinguishers, along with Elkhart brass, fire monitors, nozzles, etc.

All of these services are performed using Safety Plus Limited technicians, without sub-contracting. We do not depend on another company for our expertise we use our own technicians to service and repair your fire extinguishers; this gives us better control over the quality of service we are able to provide, along with reduced cost. When you call Safety Plus Limited we put you in contact with an individual specifically trained to address your fire protection needs.

At Safety Plus we have the formula for quality and affordability. Our year of experience in the industry, investment in technology and our investment in our people eliminate mistakes and emphasizes quality in the service we produce.

We are continuously improving our service through research and development. We always strive to educate ourselves and our customers on the relevant changes in the industry.

That's why our customers come to us and keep coming back. Our quality is second to none; costs are affordable and reflective of the value delivered. Whether you're a small company, a company with thousands of employees, Safety Plus has what you're looking for.

Some of the services offered by this division are as follows;

- Ships, Rigs and Offshore vessel fire suppression and extinguisher recommendation, inspection and maintenance.
- Commercial building and Facilities fire suppression and extinguisher recommendation, inspection and maintenance.
- Industrial Plant and Equipment fire suppression and extinguisher recommendation, inspection and maintenance.
- Service contracts for maintenance of Fire extinguishers, Hose reels, Suppression Systems.
- Hydro testing of Cylinders.
- Filling of breathing air cylinders.

GAS DETECTION

Industrial Scientific designs and manufactures gas detection products that protect workers from hazardous conditions around the world. Since their beginnings in 1985, they have pioneered numerous technologies including the first 3-gas detector, 6-gas detector, wireless gas detector, and even the first gas detector to be included on a NASA space shuttle. Today, they continue to innovate and expand their hardware offerings to equip the connected workers of the future. Their latest gas detectors and accessories make it possible to see and respond to hazards as they unfold, bringing them one step closer to their vision of ending death on the job.

Whether you need gas monitors for remote sampling, confined spaces, area monitoring, or personal protection, we have a range of durable equipment backed by ISD's Guaranteed for Life™ warranty to meet your detection needs.

Gas Detection for Your Application

Gas detection is not a one-size-fits all business. It takes knowledge and expertise to make sure your workers are protected every day. We have a well-rounded selection gas detectors to meet your needs from single gas to multi-gas and area monitors.

Our diversified product offering includes:

- Single Gas Monitors
- Multi-Gas Monitors
- Area Monitors
- Docking Stations
- Accessories

Advanced Technologies

Innovation is in their DNA. At Industrial Scientific and Safety Plus Limited, we are continually looking for ways to help our customers reduce risk and improve efficiency.

Some of our latest technologies designed to enhance safety and improve productivity include:

- Real-time monitoring
- Peer-to-peer networks
- People and asset management

EMERGENCY EYE WASH AND DRENCH SHOWERS

Safety Plus Limited is a supplier for Haws Corporation in Trinidad and Tobago. Representing Haws Corporation System was a clear choice for the brand is synonymous with innovation, quality, reliability and affordability.

For over 103 years, Haws has been committed to bringing the highest quality water delivery and emergency equipment products to a wide variety of markets.

Haws manufacture award-winning drinking fountains, electric water coolers, hydration stations and emergency equipment for a diverse set of industries.

Why Haws?

Cutting Edge Technology and Thought Leadership

- As pioneers in the world of drinking fountains, hydration stations and emergency equipment, Haws consistently offers the newest, most innovative features and functionality for your specific project needs. You can expect this trend to continue because Haws is led by the most influential thinkers in the industry.

Low-Cost Maintenance - Haws product feature high-quality, innovative parts that require very little maintenance. Haws stands by all products and offers an extensive warranty for all products.

Superior Product Components - You can expect the absolute highest quality products and components from Haws. For example, all Haws drinking fountains have met the stringent California AB1953 lead content standard for almost 20 years!

■ **The Absolute Best in Service and Support** - Most Haws customers are sophisticated and capable specifiers, engineers, managers, contractors and architects. Still, in the highly demanding and ever-changing landscape of plumbing and safety, you can rest assured knowing that Haws will always offer you the exact amount and type of assistance needed to keep your specific project on track and on schedule. The Haws customer support team has satisfaction ratings that consistently exceed industry averages and support is available to all customers 6:00am - 4:30pm (PST), five days a week. Beyond support, any of your custom project needs can be met clearly and completely by Haws' team of professional engineers.

■ **Save Money on Costly Bottled Water** - Using the HydrationStation can dramatically impact your bottom line by reducing bottled water and water cooler costs. Today, bottled water costs between 240 and 10,000 times the cost of the water they contain. And the empty bottle refuse the world has created will still be fouling landfills long after we've all moved on.

■ **The First Eye / Face Wash Solution Proven Medically Superior** - Haws' Axion MSR Eye / Face Wash products feature a revolutionary inverted water flow providing a Medically Superior Response consistent with all EMT, emergency room and doctors' office protocols.

FALL PROTECTION

Safety Plus Limited is the authorised distributor for Fall tech in Trinidad and Tobago. Our decision to represent Fall Tech lies in their expertise in the market. Unlike any other fall protection manufacturer this is all that they do. Fall tech specialises in the fall protection manufacturing, unlike other manufactures who are full PPE manufacturers, Fall tech is the master of their trade.

Why Fall Tech?

We Know Fall Protection...

The best fall protection is to eliminate the fall hazard altogether. We know that isn't always possible. Whether you are trying to prevent a fall with guardrail, trying to restrain a worker from accessing a fall hazard, or you need a personal fall arrest system (PFAS), FallTech can help.

We Know How To Solve Problems...

Fall protection is about solving problems for workers who are required to work at height. FallTech has a team of engineers, field experts and trainers available to perform hazard analysis and develop product solutions for the most challenging work environments.

We Know The Rules...

Fall protection at its core is driven by standards and regulations. Both OSHA code and the family of ANSI Z359 standards are central to FallTech's mission to build products that bring you safely home.

We Know Your Industry...

FallTech understands that fall protection requirements are different for each of our customers. That's why we have designed fall protection components and systems for a wide range of work settings and environments.

PERSONAL PROTECTIVE EQUIPMENT (P.P.E.)
